SUMMARY

Experienced **Mobile Developer** at BNI Sekuritas, spearheading the development of secure and scalable stock trading applications using Flutter. Integrated third-party SDKs for enhanced security. Formerly a Mobile Developer at Reku.id, specializing in Flutter and Android for Crypto Trading Platforms. Prior experience as a Fullstack Developer at Andal Software, proficient in Angular and .NET, where I engineered robust HRIS platforms. Adept at leading teams, optimizing performance, and delivering user-focused solutions across industries.

EXPERIENCE

Lead Mobile Developer

PT BNI Sekuritas   **September 2024 - Current，South Jakarta**

- Led a team of mobile developers in the creation of a new version of BIONS Stock Trading Application using Flutter, ensuring optimal performance and scalability on iOS and Android platforms.
- Designed and implemented user-centric interfaces, collaborating closely with the design and product teams to align with business goals and enhance user satisfaction.
- Integrated third-party security SDKs to safeguard sensitive financial data.
  Streamlined backend communication by implementing secure and efficient API integrations, ensuring seamless data flow across systems
- Mentored and guided team members, review code on Gitlab and fostering a collaborative environment that enhanced team productivity and delivered feature.

Mobile Developer

Reku.id   **August 2022 - June 2024，South Jakarta**

- Engineered a Crypto Trading Platform using Flutter, ensuring performance and scalability on iOS and Android.
- Designed and implemented intuitive user interfaces, collaborating closely with the design team.
- Collaborated with the Product Team to Integrate business logic and align features with business goals.
- Integrated secure and efficient APIs for seamless backend communication.
- Partnered with cross-functional teams to drive project success and maintain code quality by making the project more structured and improve the quality of existing code resulting faster release cycle.

Fullstack Developer

Andal Software Sejahtera   **February 2021 – August 2022，Central Jakarta**

- Developed and maintained backend services using ASP .NET Core API, ensuring robust and scalable server-side logic.
- Built and optimized front-end components using Angular 10, enhancing user interface business logic integration with backend side.
- Collaborated with a cross-functional team to integrate and enhance features, ensuring seamless functionality across the platform and fast in delivering feature.
- Participated in code reviews, debugging, and performance optimization to maintain high code quality and application efficiency.

Fullstack Developer Bootcamp

Dumbways.id   **November 2020 – January 2021，South Tangerang**

- Built two fullstack JavaScript applications using ReactJS for the front end and Express.js, MySQL, and Node.js for the back end.
- Developed user interfaces with ReactJS, focusing on responsive design and user experience.
- Implemented RESTful APIs with Express.js and Node.js to manage data and facilitate communication between the front end and the MySQL database.

Intern API Developer (SMK Internship Program)

PT. INTI (Persero)   **July 2019 – September 2019，Bandung**

- Developed APIs for mobile applications using Django, a Python-based web framework, ensuring robust and scalable backend solutions.
- Designed and implemented RESTful APIs to facilitate seamless communication between mobile applications and backend services.
- Collaborated with front-end developers to integrate APIs and troubleshoot issues.
